

# Rubber Coated Nylon (RCN) REACH Compliance

August 1, 2019

## NO Substances of Very High Concern in Siftex Articles

Siftex Equipment Company is a responsible company that works to contribute to Sustainable Development by integrating environmental and social concerns into our daily work. As part of our total quality management, we pay attention to environmental, health and safety impacts of our products and processes. From our business partners, we expect the same level of commitment, including full compliance with applicable legal requirements.

The European Union (EU) has adopted a new regulatory framework for the Registration, Evaluation and Authorization of Chemicals, the Regulation 1907/2006/EC (REACH). REACH establishes obligations for Manufacturers, Importers and Downstream Users of chemical substances imported to, or produced in, the European Union in amounts exceeding 1 ton/year. Only substances registered at the EU Chemicals Agency will be allowed for use in the EU/EEA.

Siftex is a downstream user of chemical substances, and as such, we are actively cooperating with our suppliers to ensure compliance with the REACH regulation requirements.

**By this letter we do inform you that the in the articles/products/components listed below supplied by Siftex Equipment Company, we are not using any Substance of Very High Concern(SVHC) in the most current Annex of the REACH Regulation, (candidate list updated July 2019), in a concentration above 0.1% in weight.**

RCN Super 2 ply Neoprene coated Nylon
