Subject: **NO Presence of Restricted Substances** (RoHS, RoHS2, RoHS3 and EU Directive)

Siftex Equipment Company uses the SDS system to provide hazardous ingredient information for our products. Our SDS reports all hazardous ingredients as defined by OSHA’s Hazard Communication Standard (29 CFR 1910.1200). Per this standard we must report, “...all ingredients which have been determined to be health hazards, and which comprise 1% or greater of the composition, except that chemicals identified as carcinogens shall be listed if the concentrations are 0.1% or greater.” The information reported to you is in full compliance with what is required of Siftex for these products.

In reference to directive compliance, we have reviewed product composition with the substances listed below.
